**U.S. AIR FORCE**

# **Purpose**

**This Force Structure Announcement (FSA) addresses Air Force Fiscal Year 2010 (FY10) force structure, realignment, and management actions supported by the FY10 President's Budget (PB). This document provides a summary of the civilian and military personnel changes and reassignment of aircraft at Air Force bases for the upcoming fiscal year**

- The FSA reflects decisions to provide unsurpassed **Global Vigilance, Global Reach and Global Power...to *fly, fight and win* in air, space and cyberspace** – today and in the future given available resources
- The Air Force has worked to achieve the proper balance across our personnel, infrastructure, readiness, and investment portfolios while fully committed to supporting overseas contingency operations
- These force structure changes enhance the Air Force's ability to create, protect, and sustain all air and space forces across the full range of military operations; the FSA directly supports new and emerging missions for the Air Force

**U.S. AIR FORCE**

# **Air Force Core Functions**

- 1. Nuclear Deterrence Operations**
- 2. Air Superiority**
- 3. Space Superiority**
- 4. Cyberspace Superiority**
- 5. Global Precision Attack**
- 6. Rapid Global Mobility**
- 7. Special Operations**
- 8. Global Integrated ISR**
- 9. Command and Control**
- 10. Personnel Recovery**
- 11. Building Partnerships**
- 12. Agile Combat Support**

The background of the slide features a light gray map of the United States with state boundaries. A blue rectangular callout box is positioned in the lower right quadrant, containing text about the Air Force Core Functions.

**The Fiscal Year 2010 budget proposal reflects a commitment to the twelve Air Force Core Functions, which provide the framework for investment and training**

**U.S. AIR FORCE**

# **Air Force Core Functions**

## **Nuclear Deterrence Operations**

Through a back-to-basics approach, the Air Force is re-emphasizing accountability, compliance, and precision in the nuclear enterprise

Consolidated all nuclear sustainment matters under the Air Force Nuclear Weapons Center (AFNWC)

Established a new Air Staff Nuclear Directorate responsible for policy oversight and integration of our nuclear enterprise activities

Standing-up Air Force Global Strike Command (AFGSC) to consolidate Air Force Intercontinental Ballistic Missiles and nuclear capable bombers under a single command

The FY10 PB increases nuclear related personnel by 2,500 and adds a fourth B-52 squadron

The FY10 PB also places additional emphasis on strengthening the physical integrity of our Weapons Storage Areas

U.S. AIR FORCE

# Air Force Core Functions

## Air Superiority

Air Superiority and Global Precision Attack remain the foundations of our ability to deliver *Global Power*

Accelerating the retirement of legacy F-15s, F-16s, and A-10s enables us to redistribute funding to modernize a smaller, more capable, Combat Air Force (CAF) as we field F-22s & F-35s

We are validating the remaining service life for our current fleet of F-15s, F-16s, and A-10s

The CAF Restructure plan accelerates the retirement of 254 aircraft (including 5 previously scheduled) in FY10. The Air Force will realign > 4,000 authorizations to other critical mission areas: nuclear enterprise, manned and unmanned surveillance, intelligence support to the combatant commanders, etc.

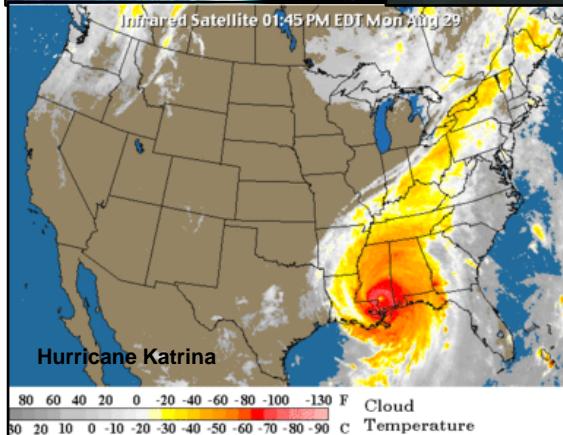

U.S. AIR FORCE

# Air Force Core Functions

## Space Superiority

America's ability to operate effectively across the spectrum of conflict is enabled by our space capabilities

We will field several new satellites, including the Global Positioning Satellite Block IIF, Advanced Extremely High Frequency (AEHF), and Space Based Surveillance System (SBSS) – recapitalization programs important to both the US and its partner nations

Capabilities provided to the joint force:

1. Early Warning
2. Space Situational Awareness
3. Military Satellite Communications
4. Positioning, Navigation and Timing
5. Weather

U.S. AIR FORCE

# Air Force Core Functions

## Cyberspace Superiority

Operating within the cyber domain has become an increasingly critical requirement for our networked force – the Air Force is committed to developing the necessary capabilities to defend the cyber domain

24th Air Force

Standing-up Twenty Fourth Air Force (24 AF) under Air Force Space Command (AFSPC) to better develop and integrate cyberspace capabilities into the joint cyberspace structure

U.S. AIR FORCE

# Air Force Core Functions

## Global Precision Attack

We continue to invest in weapons and platforms for Global Precision attack (i.e. JASSM-ER, JDAM)

We are modernizing our existing bomber force to increase its effectiveness and survivability against emerging threats while meeting the requirements to today's Joint Force Commanders

Investments in low observable maintenance improvements will decrease sustainment costs and reduce aircraft downtime

Long-range strike remains a critical element of our nation's power projection capabilities. We will leverage the results of both the Quadrennial Defense Review and Nuclear Posture Review to gain a better understanding of the requirements, technologies, and concept of operations for the future long-range strike aircraft

U.S. AIR FORCE

# Air Force Core Functions

## Rapid Global Mobility

Replacing the aging KC-135 fleet remains the Air Force's top acquisition priority

The C-17 and C-5 programs of record, 205 and 111 respectively, meet current mobility requirements. On-going mobility studies will guide future fleet management decisions

Balancing C-130J recapitalization with C-130E retirements provides improved intra-theater airlift capabilities to the Joint Force Commander

With 38 C-27Js, the Air Force is “all in” to provide time-sensitive/mission-critical airlift in direct support of our joint partners

Global Reach ensures our joint team can deploy, maneuver and sustain large forces on a global scale

U.S. AIR FORCE

# Air Force Core Functions

## Special Operations

Responding to growth in the requirements for Irregular Warfare (IW) and the increasingly important role special operations forces play in today's fight, we have prioritized investments to continue growing special operations capabilities

We are committed to enhancing special operations capabilities – procurement of additional MC-130J and CV-22 aircraft and expanding special operations ISR force structure will continue

We are recapitalizing our MC-130E/P fleet with newer, more capable MC-130Js for low-level air refueling, infiltration, exfiltration, and resupply of special operations forces

U.S. AIR FORCE

# Air Force Core Functions

## Global Integrated ISR

The post 9/11-era has seen an increasing demand for intelligence platforms in all forms. For the near future, the demand for ISR will continue

We are continuing major investments in unmanned aircraft, moving from the MQ-1 to the MQ-9

We have surged UAS capability into theater and achieved 34 Combat Air Patrols (CAPs)  
– 10 more than planned and a year ahead of schedule

The FY10 PB continues major investments in unmanned aircraft to increase our UAS CAPs to reach our goal of 50 CAPs by the end of FY11

*“A balanced approach means finding the right balance between prevailing in today’s operations with today’s capabilities, while simultaneously investing in new capabilities and force structure to meet tomorrow’s threats.” – Secretary of the Air Force Michael B Donley*

U.S. AIR FORCE

# Air Force Core Functions

## Command and Control

The Air Force has established Air and Space Operations Centers (AOCs) aligned with each geographical Combatant Commander to integrate air, space, cyber and missile defense capabilities into joint operations

The Air Force is also training additional terminal air controllers and equipping them with increasingly capable, portable and flexible air strike control systems like Remote Operated Video Receiver (ROVER) version 5

We have improved our Tactical Air Control System (TACS) to account for increasingly distributed air-ground operations in Iraq and Afghanistan

U.S. AIR FORCE

# Air Force Core Functions

## Personnel Recovery

**Personnel Recovery (PR) is an imperative and an enduring Air Force Core Function**

**The FY10 PB terminates the current CSAR-X program to allow for additional discussion on requirements/quantities across the joint force**

**We will continue to sustain our HH-60 helicopter fleet while exploring joint solutions to ensure sufficient PR capabilities in the future**

U.S. AIR FORCE

# Air Force Core Functions

## Building Partnerships

We continue to seek out opportunities to build and strengthen our teamwork with partner air forces to bolster our interoperability and enhance our long-term security cooperation capabilities and capacity

We are also enhancing partnership relations via programs like the Joint Strike Fighter and the Wideband Global SATCOM (WGS) system

U.S. AIR FORCE

# Air Force Core Functions

## Agile Combat Support

Underpinning the work of all Air Force Core Functions are the capabilities included in Agile Combat Support

Air and space power relies on a myriad of combat support activities that Airmen provide on the ground. These include functions like force protection, engineering, other combat support functions and military medicine. Agile combat support is a vital part of what the Air Force provides the nation

**U.S. AIR FORCE**

# ***Shaping the Force Air Force End-Strength***

Over 660,000 members of our Regular, Reserve, and Guard are dedicated to the mission of the Air Force. In accordance with SECDEF guidance, we will halt active duty manpower reductions at 331,700 in FY10 and make commensurate adjustments in the Reserve Components (69,500 Air Force Reserve and 106,700 Air National Guard). Our civilian cadre will also grow to 179,044

The new Air Force end strength supports new and emerging total force missions while it robusts existing missions such as our Nuclear Enterprise, special operations, aircraft maintenance, ISR and enhanced irregular warfare capabilities

Air Force civilians remain an integral part of the Total Force team. The main drivers for civilian end-strength increases are ISR, acquisition excellence, nuclear enterprise, contractor to civilian conversions, and manpower growth for Commander's support

Authorized End-strength		
	FY09	FY10
RegAF	317,050	331,700
Reserve	67,400	69,500
ANG	106,756	106,700
Civilians	171,313	179,044

**U.S. AIR FORCE**

# Caveats

- The following programmatic actions are not reflected in this product due to pending basing and/or personnel decisions:
  - Headquarters Twenty Fourth Air Force (24 AF)
  - Additional B-52 squadron
  - MC-12 Project Liberty
  - Increase in Acquisition Workforce
  - Contractor-to-Civilian conversions
  - Joint Cargo Aircraft (JCA) pending OSD-approval of joint implementation plan
  - Follow-on missions for bases impacted by the Combat Air Force (CAF) restructure
  - Prior year programmatic actions that have FY10 impacts (i.e. 2005 Base Realignment and Closure, Air National Guard reset, etc.)

U.S. AIR FORCE

# State-by-State Data

- This force structure announcement is a snapshot of FY10 & does not include the Future Years Defense Program (i.e. FY11 & later)
  - Captures only approved Unit Manning Document (UMD) changes programmed in the FY10 President's Budget (PB)
  - Manpower changes are given as deltas (FY09 PB to FY10 PB)
    - Regular Air Force Military
    - Reserve Military (Full-Time), Guard Military (Full-Time)
    - Civilians \*
    - Reserve Drill (Part-Time) \*
    - Guard Drill (Part-Time) \*
  - Air & Space platforms are presented as current FY09 beddown (as of 30 Sep 09) and FY10 beddown (status to be as of 30 Sep 10)

\* Note: Changes to dual-status Air Reserve Technician (ART) numbers are reflected in *both* civilian and Reserve/Guard drill totals

Updates to the Air Force FSA will be accomplished semi-annually and provided to Congressional members and staff as requested
